TRANSPORTATION OPTIONS FOR SENIOR ADULTS IN THE CAPITAL REGION

DIRECTORY

For seniors, transportation is a vital aspect of remaining independent since it provides access to healthcare, support services, and community activities. Many Americans take for granted using their own vehicles to arrive at their destination with little thought about how they are going to get there.

For many seniors, health conditions prevent them from driving safely to appointments. Medical appointments, grocery shopping, and social activities can decrease after people no longer have the ability to drive themselves or have a friend or family member to transport them to their appointments. Arranging transportation to appointments can be a burdensome and sometimes impossible task without having current information on transportation options.

Yet, there are many options in addition to a personal vehicle for senior transportation. Public transportation, senior transportation vans, medical transportation services, volunteer-based transportation services, and taxis provide transportation services. More recent transportation options for seniors include Uber, Lyft, and GoGoGrandparent.

Often transportation options for seniors are highly dependent on where the senior lives (urban, suburban, or rural settings), including the county or municipality of residence; the ability to pay for the transportation services; and what type of adaptive equipment the rider needs (including a wheelchair or walker) to ambulate.

This directory provides the name, contact information, specific services provided, hours of service, accommodations, and fees for the senior transportation options in Albany, Rensselaer, Saratoga, and Schenectady counties.

Developed by Albany Guardian Society, the Capital District Transportation Committee and the Siena College NExT program, this directory is intended to assist seniors in finding the best and most affordable transportation options for their healthcare, support, and service appointments.

Addressing the COVID-19 virus has resulted in some transportation providers in this directory either suspending or greatly reducing their services. Please call providers, or check their website, for updated hours and services.

Albany Guardian Society is one of the oldest not-for-profit charitable foundations in the Capital District of New York State.

Founded in 1852, its mission is to improve the lives of seniors in the Capital Region, their families and their caregivers, through information, education, research, and collaboration. Albany Guardian Society's Institute offers over 140 classes per year in a small classroom setting, or through Zoom, on a wide range of topics of interest to both consumers and aging service providers. Albany Guardian Society also partners with organizations to convene community forums on an extensive array of topics that can improve the quality of lives for seniors. Along with this Transportation Directory, Albany Guardian Society publishes a Housing Options Directory. Both directories are for Albany, Rensselaer, Saratoga, and Schenectady counties.

For more information about AGS, go to www.albanyguardiansociety.org or call 518-434-2140.

The Capital District Transportation Committee (CDTC)

is the designated Metropolitan Planning Organization required by federal law for the Albany-Schenectady-Troy and Saratoga Springs metropolitan areas. Supported with federal funding, CDTC is a forum for local elected officials and transportation representatives to share ideas and make decisions about major transportation capital investments, including about \$100 million in mostly federal funding per year. The Regional Transportation Coordination Committee (RTCC) is hosted by CDTC and includes public, private, non-profit, and human services transportation providers. The RTCC works toward better integration and coordination of public transit-human service agency transportation services.

For more information about the CDTC, go to www.cdtcmpo.org or call 518-458-2161.

Siena College's Center for Academic Community Engagement program "NEXt Services"

cultivates interdisciplinary student led teams to engage in extensive capacity building research and consulting with local community organizations. This mission is accomplished through a threefold approach of faculty led classes, student led internships, and collaborative summer research.

How to Use this Directory

How Is the Directory Organized?

The directory is organized alphabetically by organization name. At the beginning of the directory, we have included a table showing which organizations provide services in each county – Albany, Rensselaer, Saratoga, and Schenectady.

Am I Eligible?

Many of the organizations listed here restrict their services to certain individuals. Restrictions may be based on your age, where you live, and whether you have a disability or other health condition. In addition, some organizations require you to pre-register before receiving a ride or other services. These restrictions are listed in the “Who May Ride” section within each listing.

Where Can I Go?

Most organizations listed here will provide services within a certain area. This area is frequently defined by town or city. Some organizations will only provide a ride for certain trip purposes, such as medical or shopping. This information is listed in the “Description” section within each listing.

What If I Have a Disability, or Need Special Accommodations?

This directory notes the ability to provide services if you use a wheelchair, have a service animal, have limited or no vision, or if you have dementia. These are all contained in the “Can Accommodate” section within each listing. If a listing does not have a “Can Accommodate” section, the organization may not have an ability to provide services to you. If you have any questions about available accommodations, you may contact the organization directly.

If you use a walker, cane, or other mobility aids, you will need to be able to enter and exit the vehicle without assistance, and load it into the vehicle yourself. If you use a large mobility aid and you are scheduling a ride in a small vehicle such as a van, you may want to advise the provider that you will need some space for your mobility aid.

Where Can I Get More Information?

Each listing provides contact information that you can use to contact each organization directly and request additional information.

What Do Transportation Providers Expect of Me?

All providers require riders to remain seated with a seatbelt, or in the case of a wheelchair, that it is secured, for the duration of the trip.

What About Taxis?

There are many different taxi companies in the Capital Region, some with only one vehicle, others with several vehicles. For the sake of simplicity, only taxi companies that have at least one wheelchair accessible vehicle are listed in this directory.

What is Uber and Lyft?

They are both private transportation services that employ individually contracted drivers to provide the transportation. Rides are arranged electronically (primarily through a smartphone) for one-way transportation.

What is GoGoGrandparent?

It’s a service accessed through the telephone that arranges transportation for seniors, using Uber or Lyft. There is a separate charge for this service beyond the cost of the transportation.

A family member or friend can be registered to receive text messages about the trip in case they are concerned about the person who requested the ride. They will receive text messages when the person requested a ride, who the name of the driver is, how long before the driver gets there, if they got picked up, and when they were driven back home.

Definitions

Adaptive Equipment

The items a person needs to help them with certain tasks. For this publication, examples of adaptive equipment could be a wheelchair, walker, rollator (a walker with wheels, sometimes handbrakes, and a seat), crutches, a cane, motorized scooter, or stretcher.

Ambulate

A term used to describe how you walk, get around, or move about.

Bedside-to-Bedside

Medically trained crew or personnel accompanies the rider when they are transported from one location to another. This includes transferring the person via wheelchair or mobile hospital bed to the properly equipped vehicle. The rider requires continued medical care or assistance from their departing location until they reach their receiving destination. This is the highest level of assistance.

Curb-to-Curb Service

The rider is picked up at the curb and then dropped off at the curb when they reach their destination. The rider must be able to get out of their home and out to the curb by themselves, without any assistance from the driver.

Door-to-Door

The rider may require door-to-door transportation if they need assistance getting out of their home and into their appointment. This involves trained drivers entering the residence and physically assisting the patient into a wheelchair, onto a stretcher, or simply helping them to walk out of their home. This is a higher level of assistance than curb-to-curb service.
